// Ability to **work effectively in a team**, have experience in implementing a group project.

About me

I am a Front-end developer based in Saint Petersburg, Russia.

I have knowledge of Wepback, Typescript/Javascript, React, Redux, CSS (SASS), NodeJS, Express

I studied web development mainly on my own from open sources, also i used some educational courses to make it easier to understand the direction of learning the material. During the studying, I paid a lot of attention to working with javaScript, both in theory and in practice.

I am looking forward to working in teams as well as individually. I am not only willing to deepen my knowledge but I also want to apply them to the real products.
